OBJECTIVE

A highly motivated and skilled Full Stack Developer with a strong foundation in both front-end and back-end technologies, aiming to leverage my expertise in web development to contribute to innovative projects. My Objective is to Contribute to the Company's Success through Collaborative Problem-Solving.

PROJECT

Train Ticket Reservation System

- The Train Ticket reservation system facilitates the passengers to enquiry about the trains available on the basis of source and destination, booking and cancellation of tickets.
- The aim of case study is to design and develop a database maintaining records of different trains, train status and passengers. It is the computerized system of reserving the seats of train seats in advance. It is mainly used for a long route. Online reservation has made the process for the reservation of seats very much easier than ever before.
- This project was developed on **HTML, CSS, JavaScript** as Frontend and **PHP** is a server side scripting Language, **MYSQL** database in Backend.
- **Tool and Server** : Visual studio and Wamp Server
